Following an international call for proposals launched by UNDP Lebanon, SIT Elearning Solutions was selected to carry out a project entitled: "Design, development, and learning experience of the peace building toolbox (digitalization)"

The objective of this project was to develop digital learning content and learning platforms, as follows:

- Design and develop a bug-free, easy-to-manage, user-friendly and responsive web application/learning platform for teachers and facilitators to access the various content and activities designed and developed by the project.
- Provide all related multimedia resources and content needed for the toolkit.
- Configure, develop and implement materials on the learning platform and provide all platform-related resources in addition to "train the teachers" materials.
