The project consists in the content development for an E-learning training, covering the use of "Mankoulet" the application of the Common Director diagram.

"Mankoulet" is an application developed by CNI, having the objective of monitoring different stages through which all real estate passes from purchase to reform.

This course is based on the perfect and total simulation of this application. It also includes evaluation tests at the end of each unit to assess the trainees' performance.

Other functions such as Small administrators, forums…, were integrated into this project to guarantee the follow-up and animation tools of the E-learning training.
